

Dear Haldsburg Branch,

Thank you so much for sponsoring me! I had so much fun at Tech Trek. I learned how to make a flashlight by folding wires onto a circuit board. I messed up the first time, but the second time I tried, I got it right. It was a lot of fun making the flash light. When I first got here I got covid I turned out negative. Which I was super excited about since I could officially attend camp! After, I took a survey. Once I was done I went outside and they gave me a shirt and my dorm information. A counselor showed me the way to my dorm and she was really nice. On the second day we had a lot of activities like aerobics, cooking, building an app, and my core class geometry. On my third day we had breakfast to prepare for a field trip. After breakfast we waited for the bus to go to the Sonoma Water plant. After we arrived at our destination it was super hot. When we went inside we looked at a model of the Sonoma waterways and played with sand. After, we got on the bus again and went to see the Russian river. After, we went there, we went underground and saw bubbles due to the effect of seeing the river from underneath. They then let us go into a little room and we found a frog. This experience was super cool. I loved meeting new girls. They were all so nice. My favorite experience was meeting my dorm friends. They are all so nice.

Sincerely, Brisa
