

Dear AAUW Healsburg
Thank you for this amazing opportunity. It is so amazing to be around girls that are just like me. Before this camp I thought that science was interesting in science at my school. When I came to this camp it was like a whole new world opened up. I was exposed to all the other parts of STEM. Botany was my core class, when I got it I was not that excited but I ended up really liking the class. I loved the teacher and how she taught the class. I especially liked how we went on walks to look at all the nature on the campus. I also loved learning all the things that plants do for us and the environment. Me and my roommate have become good friends, she is really funny and nice. I am so glad you raised money to send me here. These memories will last a lifetime.

Sincerely
Afifa
