

THANK

YOU!

AAUW Healdsburg Branch

Dear AAUW Healdsburg Branch;

Thank you for the opportunity to go to Tech Trek. This means a lot to me. This experience helped me realize my passion for engineering that I might not have realized without it. I have learned a few things throughout this camp especially in my core class, Aerospace Engineering. One of the most important things I learned was the engineering process; the steps you go through when working on a solution to a problem. I will probably use this process again and again over time. Another thing I learned was how to solder when we made our own flashlights. During Tech Trek, I made many friends. It's really fun to be around people that share the same interest in STEM. Thank you again for this unforgettable experience. Sincerely,
