Dean Healdsburg AAUW,

First, I would like to start off by thanking you guys for giving me this wonderful opportunity to learn new things in a new way. My core class was Botany and I learned a lot. I learned how to identify and dissect plants and seeds, how to apply for colleges, and more. My favorite part of the whole camp is Professional Women's Night. Seeing women like me succeeding in a harsh STEM workforce was so inspiring. Thank you for considering me and inspiring me to continue an interest in STEM.

All my love

-Riley
