

Dear Healdsburg AAUW,

I would like to thank you for allowing me or giving me this opportunity to join and experience Tech Trek.

My core class was aerospace engineering. The teacher was really nice and supportive, her name was Kelly Ristau. I really enjoyed class there for me which made me feel happy and warm inside.

During my time here I was able to create new friendships that I never knew I needed. I made friends with all my dormmates and even be more interactive and social.

I learned a lot of new math, but not only math but I also learned about other things like people and of course science, and etc. During dorm time I learned more about the people around me and during class I learned so much more. I want to bring to my siblings and parents once I get back home.

Sincerely,

Marya
